

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

August 30, 2002

Re: IRO Case # M2-02-0930-01

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IRO's, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The ___ reviewer who reviewed this case has determined that, based on the medical records provided, the requested treatment is medically necessary. Therefore, ___ disagrees with the adverse determination regarding this case. The reviewer's decision and the specific reasons for it, is as follows:

History

This case involves a 63-year-old male who was injured on ___ and who has a painful polyneuropathy which has been refractory to medication management. Sympathetic Treatment System provides temporary relief.

Requested Service(s)

Sympathetic Therapy Home Unit

Decision

I disagree with the carrier's decision to deny the requested Sympathetic Therapy unit.

Rationale

Neuromuscular stimulation is providing temporary relief for this very difficult condition. A one-month trial of a home unit with close monitoring to determine its efficacy would be appropriate before committing to purchasing the unit..
